Patterson Water Heaters

for all purposes—industrial and domestic

Patterson Type D

Instantaneous Hot Water Service and Heater is ideal for installations where hot water requirements are constant—or for use as a hot water converter in heating systems. Especially adapted for swimming pools.

Patterson Type B

Combined Hot Water Service and Storage Heater is for any service where hot water requirements are not constant—or where a large volume must be stored for heavy demands. For apartment houses, hotels, laundries, etc.

Patterson Heaters are of heavy construction with '∩' shape heating sections of seamless, drawn copper tubing. Made for any working pressure and service

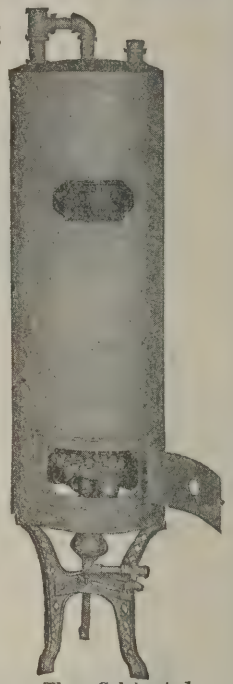
PLAIN TYPE WITHOUT THERMOVALVE CONTROL



The Combination Gas Heating Range Boiler with its built-in gas heating equipment should displace the installation of plain range boilers supplemented with side gas heaters, and in many parts of the country it has done so.

"Economy" and "Peerless" gas heating range boilers are sold by Plumbing, Mill Supply and Hardware Jobbers in every state in the Union and if any one of such jobbers is not selling them, he is losing much profitable business to his competitors.

DAKE Single Drum Hoisting Engines are made in eight sizes, ranging from 2 h.p. to 30 h.p. Tight or friction drums, with reversing engine and foot brakes. Also double and single gearing and two drum units.

No matter how exacting, or how limited your space

DAKE hoisting engines are designed with the engine built in as part of one side standard. The engine is a double piston type operating by both force and expansion of steam. You will be surprised at the compact, sturdy construction and the power of these hoists. They are simple to operate, safe and economical.

"An electric hoist for everybody"

IN practically every line of business and every branch of industry this powerful little ½ and 1 ton electric hoist has effected remarkable economies in moving and lifting material of every description

In the *LiftAbout* are incorporated the same features of design and construction which have resulted in the extensive use and popularity of Shepard Electric Cranes and Hoists. For its superior design and construction, a *LiftAbout* is surprisingly low in price, and this is due only to standardized manufacture and quantity production.

Write for book showing 50 different applications

"Aerial Railway of Industry"

To all points without change, or without rehandling load. A combination of Shepard cage Operated Electric Hoist, Shepard Transfer Crane, overhead track and switches. Write for book completely describing this remarkable system.

Motor-Driven Trolley Hoists with Floor Control

For lifting and moving the heavier loads, "Shepard" builds floor and cage operated hoists in capacities to 10 tons.

PORTABLE HOISTS

There are many places for the "Little Tugger" Hoist in all sorts of work. It can be clamped or bolted to any handy support and operated in any position. Either compressed air or steam furnishes power.

They are built in several sizes (to develop from 3½ to 12 H.P. from 60 to 80 pounds gauge pressure) and in single and double drum patterns.

For hoists of larger capacity the Ingersoll-Rand Air Motor Hoist is recommended. They are offered in five sizes, from 500 to 10,000 lbs. capacity, with a standard lift of 15 feet.

BADGER SELF-EQUALIZING EXPANSION JOINTS

CHANGES in temperature cause material changes in length of steam, air, water, and other pipe lines. To care for these changes safely a Badger Expansion Joint should be installed in a pipe line, otherwise the pipe joints will work loose and leak, or the fittings may become fractured, due to the irresistible strains of expansion and contraction.

AMES BENCH MILLING MACHINE

Ames Bench Milling Machine is designed for small light milling on tool jig and model work, as well as on regular manufacturing. The machine is built solid and compact, with large range of working space and will handle medium heavy work within its capacity, yet is sensitive and handy in its operation for the finest and most exacting of work.

Ames Dial Gauges

In addition to our Bench Tools, we make a complete line of Dial Gauges, unequalled for the accurate duplication of parts, the measurement of wire, watch parts, paper rubber and sheet metals.
